Building a Package

Assess Data Files

Connection
Managers

Containers

Variables

Parameters

Back from Lunch

Considering Columns

Does the column need to be imported?

What is the column's data type?

Is the column always populated?

Talking to a Colleague

Crime ID

Month Column Split

Month Column

More Colleague Confirmation

Numeric Month and Year

Last Outcome Category

Value Present

Empty Value

Brilliant Analysis

Migrating SSIS to Azure Data Factory

Migrating SSIS Packages to Azure Data Factory

by Ravikiran Srinivasulu

Lift and shift your SSIS Packages to the cloud. In this course, you will learn the benefits of cloud migration and how to run, schedule, secure and monitor your SSIS Packages with Azure Data Factory v2.

<https://app.pluralsight.com/library/courses/ssis-packages-azure-data-factory-migrating/table-of-contents>

Boring Connection Managers

Connection Manager Types

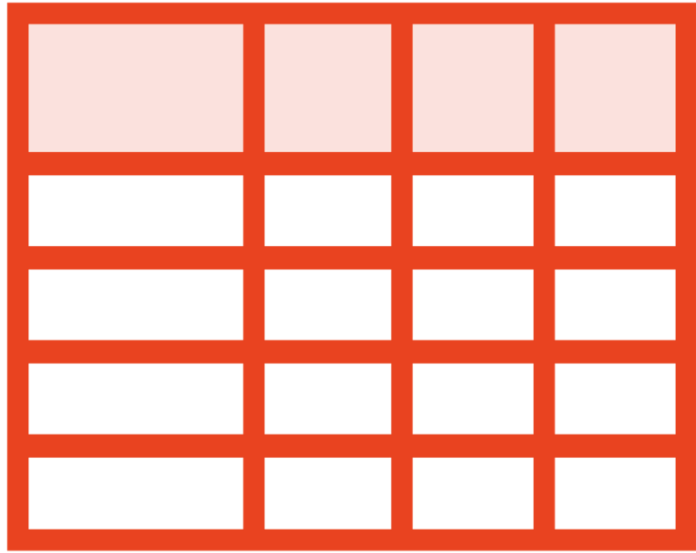

Write Your Own

Other Import Tools

Horses for Courses

SSIS

Possible Alternative

It Doesn't Depend

It Depends (Again)

Benchmarking

OLE DB vs. ADO.NET

OLE DB

Supports Lookup transformation

SQL authentication in Azure

Requires use of casting in scripts

EXEC Proc1 @Id = ?, @Name = ?

Performance testing required

ADO.NET

Does not support Lookup transformation

Supports Active Directory in Azure

Use directly in scripts

EXEC Proc1 @Id = @Id, @Name = @Name

Performance testing required

Bertie's Choice

ADO.NET

Avoid Refactoring

Refactoring Takes Time

Be Confident

Project Connections Deployment

Project Connection

SSIS Catalog

Package Requirements

Handle Multiple Files

Maintain Audit Trail

Handle Exceptions

Archive Processed Files

Send Status Report E-mail When Errors Found

Package Requirements

Handle Multiple Files

Maintain Audit Trail

Handle Exceptions

Archive Processed Files

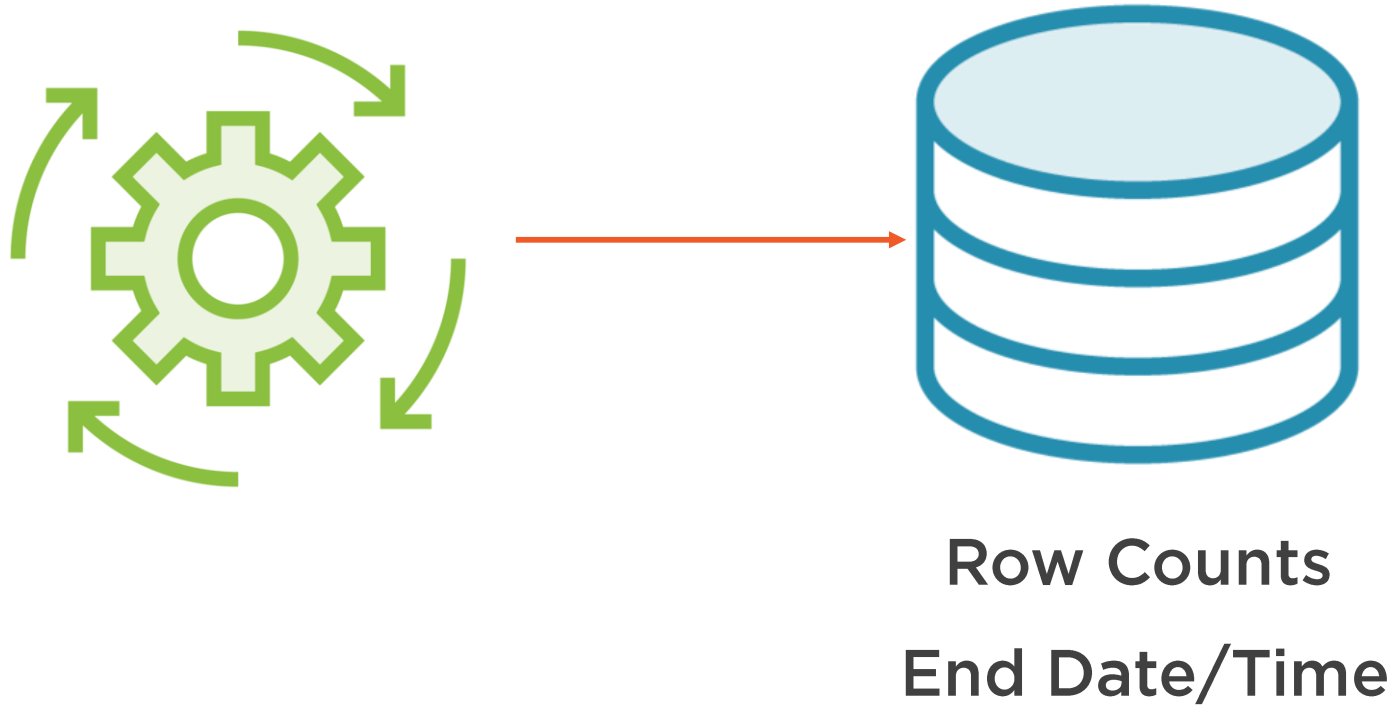

Send Status Report E-mail When Errors Found

Capturing Metadata

Updating Metadata

Variables

File Name Variable = ~~File.txt~~ **File1.txt**

Two Things Left

Configure Folder

Check ID

Parameter Types

Parameters can be used with the SSIS catalog

Package parameters are specific to one package

Project parameters can be shared between packages

Parameters can be added to catalog configurations

Parameter Deployment Support

Cannot use parameters with package deployment

Use variables with package deployment

Configuring and Deploying SSIS

[https://app.pluralsight.com/library/courses/
configuring-deploying-ssis-packages/description](https://app.pluralsight.com/library/courses/configuring-deploying-ssis-packages/description)

Flow vs. Parallel

No need to connect tasks if they can execute concurrently

Connect tasks when dependencies exist

Overview/ Summary

Creating the database

Creating the SSIS package

Connection managers

Control flow and containers

Variables and parameters

Script tasks
